SANDEN GROUP

SANDEN, global expert in thermodynamics technologies, is recognized as one of the leading manufacturers of heating and cooling solutions in the world. With 54 locations in 23 countries, SANDEN develops and produces

- » Complete systems for automotive air conditioning
- » Heating equipment based on natural CO₂ refrigerants
- » Beverage and snack vending machines
- » Refrigerated showcases

SANDEN high quality and innovative solutions improve the daily life of consumers and professionals all around the world. Keeping drinks fresh, air-conditioning car or heating home are one of our prime objectives.

SandenVendo GmbH in Europe has been making significant advancements in the vending industry for many decades and is a powerful partner for excellence in quality, reliability and service.

We are a “one-stop shop supplier”, offering a wide variety of vending equipment for hot and cold beverages, snacks and ice cream, but also related products such as sophisticated payment systems and premium coolers.

Originally based in Dallas, Texas, USA, SandenVendo GmbH continues to deliver the highest standard product diversity since the beginning of its operations over 80 years ago.

As part of the Japanese Sanden Corporation since 1988, SandenVendo GmbH is your global partner in vending and cooling technology, backed by numerous production and service facilities around the world.

GLOBAL MARKET SHARE OF THE SANDEN GROUP

SANDEN, global specialist in heating and cooling technologies, are recognized as one of the leading companies in thermodynamics both in the automotive industry and mobile appliances such as food refrigeration.

1943 Our story began

Based on the Environmental Chapter of Sanden Corporation, we fully understand that preserving the Earth's environment is the most important shared responsibility of mankind.

In order to pass on a safe and clean Earth to the next generation, we, all staff members, will take the appropriate steps in all areas of business activities to preserve the environment with our company slogan:

"We contribute to the future of a safer and more beautiful Earth."

We contribute to the future of a safer and more beautiful earth

Heaven, Earth and Man, are the three fundamental elements that create the Universe and therefore, we should keep the harmony among those elements which reflect on our everyday life.

This is the foundation of the SandenVendo ECO Philosophy.

We will keep and conserve them also in the future by protecting them as much as possible.

HC & CO₂ Powered by Nature

SandenVendo strives to create ECO-friendly solutions by applying Natural Refrigerants, in order to reduce the direct and indirect emission of greenhouse gases and less impact on GWP.

Both **CO₂** (R744) and **HC** (R290) refrigerants has minimal GWP and Zero ODP.

PATENTED SOLUTION

R290 is a natural commercially available modern refrigerant. The non-toxic hydrocarbons are an eco-friendly alternative to the CFC/HCFC/HFC fluorocarbons related to ozone damage.

SandenVendo has met this challenge by pioneering an innovative patent pending process where R290 is safely applied for the current range of refrigerated vending machines.

More than 500,000
vending machines produced

Proud supplier in five
Olympic Games

13,398 employees

Key supplier for main European
Drink & Snacks producers

G-Caffè

Something truly special

EXCELLENT ITALIAN ESPRESSO

The SandenVendo Coffee brewer delivers authentic espresso flavors and aromas in the way the Italians do best.

Two brewer types are available: one for the genuine Italian type espresso and the larger one for European style longer coffee, both provide an excellent Italian taste.

ONE CUP, ONE TEMPERATURE

Thanks to the precise temperature management, individual drink temperature settings are possible. Users can also adjust the temperature of their drinks on the touch screen **Warm > Hot > Very Hot.**

LOW ENERGY CONSUMPTION

Innovative temperature management with SandenVendo Instant Heater technology. It is an energy efficient design with very low thermal mass and does not require a Stand-by function. The system always uses fresh water providing the precise amount required for each drink.

Ideal for breakfast buffet.

■ CAFFÈUNO COFFEESERVER

Something new, something different

SandenVendo carefully observed the behaviour of coffee machines, studied optimization of the energy consumption and identified the root causes of chronic problems.

The challenge to create a trouble-free machine is, to say the least, big and can only be accomplished by looking at the design from a different perspective.

Bean-to-cup

ULTIMATE TECHNOLOGY FOR A REAL ITALIAN ESPRESSO

New SandenVendo Brewer

The new SandenVendo espresso brewer excels at providing an authentic Italian taste.

The brewer is available in 2 sizes of infusion chamber; v-36 for the authentic Italian type Espresso and v-42 for European style longer coffee.

Flexible Heating System

An innovative Temperature Management System.

The light weight instant heater is an energy efficient design with very low thermal mass.

Thanks to the fast water flow and vacuum system at the end of each dispensing cycle within the system, it minimizes the formation of lime scale, and always uses fresh water in the precise amount required for each drink.

No Stand-by mode required.

One Cup, One Temperature

Individual drink temperature settings are possible.

For example, Espresso is ideally served at 85-94°C, while tea typically requires a higher temperature of 95-100°C.

Customize-able drink temperature
Users can adjust the temperature of their drinks on the touch screen.

Precise temperature management
Output temperature can be controlled within +/- 1°C.

2 TYPES OF INTERFACE AND PERSONALIZATION

Choose the interface according to the needs of locations.

The interface panel can be replaced easily and panel can be personalized.

TOUCH

An elegant 10 inch TOUCH screen provides an intuitive icon menu on your fingertip!

DIRECT SELECTION

Casual and quick serving solution by choosing the drink menu directly

G-Caffè Design

■ G-CAFFÈ DESIGN

Easy, Friendly, Healthy.

NO BRASS ON BOARD. WATER CIRCUIT 100% HEAVY METAL FREE.

A new emotion.

Something to make you feel warm from the inside.

SandenVendo presents **G-Caffè**, the first Espresso Coffee Machine developed in a total fusion of Japanese technology and Italian craftsmanship.

The first ever automatic 1000 cup vending machine presented by SandenVendo: User friendly, with easy maintenance including the Vendo "all-in-one-site drawer".

A professional coffee brewer and grinder, high capacity double column stirrers dispenser and an innovative capacitive key pad.

G-Snack

A complete solution for break time

FLEXIBLE

Combined with Sanden Synchro spiral, the machines can deliver the products flexibly and unconventionally.

COUPLING SYSTEM

G-Snack spirals can be easily positioned at 8 different angles for quick spiral orientation, without removing it at all. Simply turn the spiral to set the ideal position.

RELIABLE

An advanced safety health temperature control can be programmed for individual selections.

Optic sensor detects the product delivery and assures by an extra rotation in case not detected.

QUICK AND EASY INSTALLATION

The mechanical part of the unit can be easily separated from the electronic one: this reduces the main cabinet by 20 cm!!

E-LABELING

E-labelling is capable of managing the batch upload to reduce time of price, selection and product name handling. My SandenVendo web tool supports the users by providing time and cost-efficient solutions to create easily the information to display on e-labelling.

G-Snack Evolution

G-SNACK EVOLUTION

The ultimate attributes

As an insight to the future of vending systems, SandenVendo presents the machine sure to become the center of attention. An innovative concept, adding a further evolution to the popular G-Snack range.

The new G-Snack Evolution has a capacious motorised central delivery eyelet, providing an ergonomic, attractive and intelligent design.

CAPACIOUS & FLEXIBLE

The G-Snack Evolution has a capacious motorized central delivery eyelet. Bulky products i.e. sandwich, baguette, family size biscuits can be delivered without any handling problem. Combined with Sanden Synchro spiral, the machine can deliver the products flexibly and unconventionally.

ERGONOMIC DESIGN

It was developed by first considering the well-being of the end user. An amazing concept achieved with creative engineering to yield this novel machine.

INTUITIVE & SIMPLE

An attractive machine with solid structure offers easy-to-follow intuitive functions.

Simple and flexible operation of G-Snack always comes as standard. Versatile and user-friendly programming.

RELIABLE

The state-of-art cooling system and its reliability is the SandenVendo's strength that stands out in the market. Environmental friendly features through intelligent temperature control and energy saving program.

G-Snack XL Master

G-SNACK DESIGN

Snacking, Solved!

THE COMPLETE SOLUTION

An evolutionary snack machine presented with a new look.

A spacious and brightly illuminated showcase enhances the product display.

An innovative capacitive key pad with back lit numerals provide high visibility in light and dark places. New user friendly features offer a large display in blue characters with a new easy door latching system.

New software features of shelf detection and secure vending system make the machine complete.

Slave versions are now available to operate with G-Caffè, G-Drink DESIGN as well as G-Snack DESIGN and extends further versatile utility.

Eco Bottle & Can

THE BEST CHOICE OF COLD DRINKS

The SandenVendo's fame stands for the reliable mechanism and the top quality of cooling unit for the cold drink models since 30's. The recent trend is coming back to the robust and simple yet functional column vendors, where SandenVendo is referred as a market leader.

The SandenVendo's traditional Bottle&Can went through a restyling and now presented in an elegant Design line, by upgrading with modern features and user-friendly interface.

In addition, always considering environmental sustainability, this line has been developed with HC (R290) Hydro Carbon version, pursuing the commitment to natural refrigerants.
