# FRAGRANCE CONSISTENCY

## FRAGRANCES AVAILABLE THROUGHOUT OUR ENTIRE WASHROOM RANGE

Sanair 610ml

Puess 265ml

Puresan 310ml

Microair 100ml

Sanair boosters 75ml

**Our formulations are so carefully combined that over time, the top, middle and base notes reveal themselves to the senses.**

**Top:** The top notes of a fragrance represent the first impression (0-15 seconds). These are generally the first to fade given their light molecular structure.

**Mid:** The middle notes are considered the heart of the fragrance. They last longer than the top notes (15-30 seconds) and have a strong influence on the base notes.

**Base:** The base notes are the final fragrance that appear once the top notes are completely evaporated (30+ seconds). The base notes mingle with the heart notes to create the full body of the fragrance, but are typically associated with the dry-down period.

### Fragrance Consistency

Intensifying and matching your preferred aroma is possible with us thanks to our large selection of fragrance available across our washroom products. Having a global, logical and co-ordinated approach to fragrance also helps avoiding fragrance clash, and ensures the correct blend of top, middle and base notes combinations.

### Reduction in Malodour Perception

Our fragrances contain a malodour counteractant innovative technology. Rather than masking odours it neutralises the active malodour molecules and replaces them with the desired fragrance. These reduce at least 70% of the malodour perception.

# ECO FRIENDLY RANGE

## Bio Fragrances

### Available in Sanair & Puresan

#### **Bio Pure:** non-fragranced

Our Bio Refills have all the same qualities and features as our other refills, but with the added benefit of being eco-friendly sanitisers.

The Bio Refills are based on naturally occurring aerobic organisms. Unlike other washroom products which chemically attack odour sources, our Bio Refills harmlessly digest odour causing substances such as urine and fatty acids.

Because of this unique biological action the odour is completely neutralised at the source. Other

washroom products act to simply attempt to mask the odour but leave the underlying problem not tackled. The micro-organisms in the Bio Refills not only break down harmful bacteria and substances such as urine but feed on the by-products as part of their mode of action. Thus the malodour is destroyed with the release of harmless carbon dioxide to the atmosphere.

The carefully formulated Bio Refills also contain a mild but powerful, totally biodegradable surfactant derived from coconut oil.
